SLS OZONE DISINFECTION TOWER

The SLS Disinfection Tower is a powerhouse ozone injection system engineered for athletic applications operating multiple washers and disinfecting light to heavily soiled laundry. Designed to operate 24 hours per day, it is clinically proven to kill 99.9 percent of bacteria, viruses and superbugs in the wash, including MRSA!

PATENTED VARIABLE & VALIDATED OZONE

The SLS Disinfection Tower works by introducing ozone into the washer sump at exactly the right water temperature and time. Using patented variable ozone technology, it monitors and maintains ozone levels according to the soil level of the load — ensuring total disinfection. Once ozone levels have met the ozone saturation point and disinfection is attained, a light illuminates on the tower.

SLS DISINFECTION TOWER BENEFITS:

- Validated disinfection
- Clinically proven to kill 99.9 percent of viruses, bacteria and superbugs
- Patented injection technology
- Eliminates odors
- Reduces water and chemical usage
- Reduces wastewater pollutants
- Mobile tower design
- Light to heavily soiled laundry
- For use with multiple washers
- Can operate 24 hours a day
- Room sensor monitors ozone levels
- Validated to meet OSHA requirements
- Patented Variable Ozone
 - Sensors mounted to each washer automatically adjust ozone amount according to the load size and soil content.
- Patented Validated Ozone
 - Verifies that ozone levels have met the ozone saturation point on each load and disinfection is attained when a light illuminates on the Disinfection Tower.
- UL Listed generator
- CDC approved (Centers for Disease Control and Prevention)
- No special electric or plumbing hookups required

OZONE

Ozone is a powerful and safe cleaning agent that disinfects laundry using mostly cool water. Used correctly, it cuts hot water usage, eliminates odors, reduces chemical usage and wastewater pollutants while disinfecting. It gets athletic laundry cleaner, brighter and softer.

Sports Laundry Systems are specifically engineered for athletic laundries and the disinfection of uniforms, loops, towels, practice gear and more. They combine the power of high-speed washer-extractors, ozone disinfection towers and high-performance dryers. Unlike other laundry solutions, Sports Laundry Systems properly clean and disinfect soiled laundry — helping thwart the spread of infection in the wash.

AFL SERIES

SLS OZONE LITE

The SLS Lite is an economical ozone injection system for athletic applications that are cleaning laundry with light to medium soil levels. Engineered to operate up to 12 hours per day, it disinfects and properly cleans athletic laundry.

OZONE POWER FROM A COMPACT DESIGN

Featuring a compact design, the SLS Lite can be wall mounted. Like the Disinfection Tower, it injects ozone into the washer at the appropriate time and water temperature — ensuring laundry disinfection. Installation is quick and easy.

SLS LITE BENEFITS:

- Ozone disinfects
- Wall-mounted, compact
- Produces ozone efficiently and effectively
- Patented injection technology
- Eliminates odors
- Reduces water and chemical usage
- Reduces wastewater pollutants
- Wall-mounted compact design (can be ordered with optional stand)
- Light to medium soiled laundry
- For use with multiple washers
- Can operate up to 12 hours per day
- Room sensor monitors levels of ozone
- Validated to meet OSHA requirements
- Variable Ozone (optional)
 - Sensors mounted to each washer automatically adjust ozone amount according to the load size and soil content.
- UL Listed generator
- No special electric or plumbing hookups required
